PROFESSIONAL SUMMARY

Full-Stack Developer with hands-on experience building, deploying, and maintaining production-grade web applications on AWS. Re-architected a single-tenant education SaaS into a multi-tenant platform, cutting hosting costs and enabling zero-touch client onboarding. Strong in Node.js, Express.js, REST API design, OAuth 2.0/JWT authentication, CI/CD automation, and database performance tuning (MongoDB, PostgreSQL, Redis). Seeking a Backend / Full-Stack Developer role to build scalable, reliable systems.

TECHNICAL SKILLS

Languages: JavaScript (ES6+), TypeScript, Python, SQL, C, HTML5, CSS3
Frameworks & Libraries: Node.js, Express.js, React.js, Django, REST APIs, BullMQ, Prisma ORM
Databases & Caching: MongoDB, PostgreSQL, Redis
Cloud & DevOps: AWS (EC2, S3, CloudFront), Docker, CI/CD Pipelines, GitHub Actions, PM2, Linux, Bash, Nginx
Security & Architecture: OAuth 2.0, JWT, RBAC, Multi-Tenant SaaS Architecture, OOP, SOLID Principles, System Design
Monitoring & Tools: Grafana, Prometheus, Loki, Git, GitHub, Postman, VS Code

PROFESSIONAL EXPERIENCE

Full-Stack Developer — Edusathi (edusathi.net) | Jul 2025 – Feb 2026
SaaS platform for education businesses | Kolkata, India

- Developed and maintained full-stack features for a production SaaS platform serving paying education-business clients, owning end-to-end deployment and CI/CD pipelines on AWS EC2.
- Proposed and led the migration from a per-client codebase model to a multi-tenant SaaS architecture, eliminating separate deployments per client and significantly reducing AWS hosting costs.
- Automated the client onboarding workflow end to end, enabling new clients to register and go live with zero manual setup, cutting onboarding time from days to minutes.
- Built and secured REST APIs with JWT-based authentication and role-based access control (RBAC), and improved backend response times through query optimization and Redis caching.

PROJECTS

Ironcloude — Cloud Storage Platform | ironcloude.co.in
Node.js, Express.js, MongoDB, Redis, AWS (EC2, S3, CloudFront), OAuth 2.0, JWT, PM2

- Implemented OAuth 2.0 and JWT authentication with role-based access control across 3 user roles (Admin, Editor, Viewer), securing all API endpoints and file-access permissions.
- Built RESTful APIs for file upload, retrieval, and deletion integrated with AWS S3 for durable object storage; deployed on EC2 with PM2 for zero-downtime process management.
- Configured CloudFront CDN, Redis session caching, and API rate limiting; improved overall system efficiency by ~30% through MongoDB query optimization and compound indexing.

AI Code Review Bot (In Development) | github.com/sujay090/Code_review
Node.js, Express.js, BullMQ, Redis (ioredis), GitHub Webhooks, REST APIs

- Building an event-driven Node.js service that listens for GitHub push events via webhooks and automatically runs an AI-powered code review for the committing developer.
- Architected concurrent background processing with BullMQ and Redis, running AI review, email, and notification jobs as separate workers so heavy tasks never block the main process.
- Designed REST endpoints to verify webhook signatures, parse commit diffs, and dispatch jobs to the correct worker queue.

EDUCATION

Bachelor of Computer Applications (BCA) | Expected 2027
Global Group of Institutions — MAKAUT (Maulana Abul Kalam Azad University of Technology), India

- CGPA: 8.13 / 10 (through 5th semester)

CERTIFICATIONS

- JavaScript — freeCodeCamp, April 2026 (View credential)
- Python — freeCodeCamp, April 2026 (View credential)

ADDITIONAL INFORMATION

Languages: English, Hindi, Bengali
Interests: Distributed Systems, Cloud Architecture, System Design, Backend Optimization, Open Source
